Index of Water Treatment Newsletter Articles (Sept 2012 to April 2013)

September 2012 Newsletter

New Safety Training Video – For Water Treatment Chemical Operations

RO Monitoring- A Probing Question

Remediating Waters with High Iron Content

Boiler System Pretreatment Matrix

Cast Aluminum Boilers – A Special Situation

October 2012 Newsletter

KWT Cleaning Process Restored Chiller Efficiency at OSU

Removal of Toxic Heavy Metals from Groundwater and Wastewater

Improve Your Softener Operation

RO Troubleshooting Guide

Water Treatment Math

November 2012 Newsletter

Batch Chromate Treatment System Saves Company \$70000 per year

AOP – An Answer for many difficult Groundwater and Wastewater Applications

An Innovative Boiler Treatment Program

Its Nearly Winter...Are your Glycol containing loops Freeze Protected?

RO Monitoring – SDI A Tool for System Design, Monitoring and Troubleshooting

December 2012 Newsletter

Predicting Mineral Scale with Computer Software

For Dissolved Air Flootation Systems- Regenerative Turbine Pumps Make a Big Difference

Corrosion Coupon Analyses

When it Comes to RO Monitoring Comparing “Apples to Apples” is Critical

Water Treatment Mathematics - Cooling Tower Evaporation

January 2013 Newsletter

RO CIP – One Key to Sustainable, Successful Operation

Polymer Technology Continues to Advance Water Treatment Practice

Nonoxidizing Biocide Selection Matrix

Blended Products for Prevention of Calcium Carbonate Deposits

March 2013 Newsletter

High Plains Aquifer – Kansas Groundwater Levels Decline as Drought Continues

Oxidizing Biocide Matrix

What's in our Test Kits?

RO Dechlorination – Protecting Membranes from Premature Failure

April 2013 Newsletter

Pneumatic RO Element Removal

Recovery Well Rehabilitation Presentation

Using RO Permeate for Boiler Feedwater – Benefits, Costs, Considerations

Troubleshooting an Industrial Water Treatment Problem – “A One-Inch Line”

Index of Water Treatment Articles (September 2012 to April 2013 Newsletters)
